EDUCATION

The Ohio State University

M.S. Computer Science and Engineering | GPA: 3.9/4.0

Aug. 2025 – Dec. 2026

Columbus, OH

The Ohio State University

B.S. Computer Science and Engineering | GPA: 3.9/4.0

Aug. 2022 – Dec. 2025

Columbus, OH

EXPERIENCE

Nationwide

AI/ML Engineering Intern

May 2026 – Aug. 2026

Columbus, OH

- Built a distributed claims risk pipeline on AWS with PySpark, engineering features from claim severity, geography, and historical data to improve model accuracy 75% over baseline.
- Developed an AI agent that generated production-ready ML repositories with batch and real-time inference workflows, REST APIs, and automated validation suites, reducing model onboarding time by 25%.
- Expanded regression test coverage by 35% across 5 production models using AWS, Jenkins, and PyTest.

Procter & Gamble

Data Engineering Intern

May 2025 – Aug. 2025

Cincinnati, OH

- Built and deployed a full-stack sales forecasting platform with Plotly Dash, PostgreSQL, Docker, and Kubernetes to support promotion analytics and lift estimation.
- Developed a baseline sales prediction algorithm, revealing \$3M+ in profit optimization across key product lines.
- Designed validation workflows in Databricks and SQL Server, reducing downstream anomalies by 33%.

Procter & Gamble

Software Engineering Intern

May 2024 – Aug. 2024

Cincinnati, OH

- Built a PyQt and Selenium form-automation tool that eliminated 750 hours of manual work annually.
- Developed a reusable Java and Selenium testing framework that increased automated test coverage by 125%.
- Built PySpark ETL pipelines in Databricks on AWS, cutting data delivery time by 80%.

The Ohio State University

Graduate Teaching Assistant

Jan. 2026 – Present

Columbus, OH

- Support an upper-level graphics course covering Unity, C#, real-time rendering, and agent-based simulation.
- Mentor 100+ students through office hours and review sessions while grading assignments, labs, and exams.

PROJECTS

RepoRover: GitHub Repo AI Assistant | *Next.js, Flask, Elasticsearch, LangChain, RAG*

- Built a full-stack RAG system that ingests and indexes 1,000+ repository files for codebase question answering.
- Developed Flask APIs with hybrid vector/keyword retrieval using embeddings and Elasticsearch semantic search.

LLM Fine-Tuning & Data Filtering | *Python, PyTorch, Hugging Face, Tinker, LoRA, OLMES*

- Fine-tuned Llama 3.2 1B with LoRA using configurable length, lexical-diversity, and deduplication filters.
- Compared 4 filtering strategies across 15 runs and built LoRA merging and benchmark-evaluation workflows.

Dissonance: Music Reviews | *Kotlin, Firebase, Android, Paging 3, REST APIs*

- Built an Android music review app with authentication, album discovery, ratings, and Firebase persistence.
- Implemented paginated API data, offline caching, ViewModel state management, and connectivity handling.

TECHNICAL SKILLS

Languages & Frameworks: Python, Java, SQL, TypeScript, JavaScript, React, Next.js, Node.js, C#, C, Kotlin, Ruby
Tools & Platforms: AWS, Docker, Kubernetes, Databricks, PostgreSQL, Jenkins, Git, Linux, Firebase, Tinker, Unity
Skills: Machine Learning, LLMs, Generative AI, RAG, NLP, Computer Vision, Data Engineering, PySpark, ETL, Backend, Full-Stack, Distributed Systems, REST & GraphQL APIs, Databases, CI/CD, Test-Driven Development, Agile
